

JACOB JENSEN for Hotels

Hotel 7B, Biarritz, France

**Telephone 1** A small and exquisite telephone. The keys placed on the stand, directly under the handset, make it easy to operate. The telephone is equipped with a memory for the most used number, ten secondary numbers and a redial function for the last number called. The R-key is for calls using a switchboard, with mute function in the handset and a high or low ringing tone adjustment.

**Telephone 50** Elegant and stylish telephone. Equipped with a caller ID function for storing up to 80 numbers. The telephone displays the number of new incoming calls and by pressing one key only you can make a direct call from the caller ID memory. The telephone is switchboard compatible.

The time, date and LCD contrast is easily set using the functional keys.

The telephone is further equipped with a mute function in the handset, on hook dialling, HI/LOW volume adjustment for the ringing tone, the handset receiver and for on hook dialling.

The telephones can be free-standing or mounted on the wall.

**Telephone 10** Award winning, cordless, digital telephone equipped with the latest DECT technology. The telephone has a long range with digital call clarity and user-friendly menu-driven functions. Six handsets can be registered to one single base unit. The telephone is switchboard compatible.

The telephone is equipped with a wide range of functions, giving great convenience in managing your telephone calls e.g. Phone Book, Redial List, Call Log List, adjustable volume, intercom between handsets, paging from the base, time and date stamp, mute, eight specially composed ringing tones and much more.

A fully charged handset has 12 hours talk time or seven days standby time. Range up to 50 metres indoor and 300 metres outdoor.

Furthermore, the telephone is provided with an intelligent low radiation feature ensuring that the strength of the radio frequency signal (RF), is automatically adjusted to the lowest possible.

The telephone can be free-standing or mounted on the wall.

Additional handset with charger can be bought separately.

The Telephone 10 consists of the Telephone 10 handset in combination with the Telephone 10 base station. The Telephone 10 base station can support up to 6 Telephone 10 handsets.

**Handset Back Plates** The handset is delivered with silver coloured back plates, which can be replaced. The back plates are available in gold, bronze and black.

#### Hotel features

- Pre-defined configurations of the user menu and functions
- User blocking to avoid guest room changes
- Message waiting indication
- Configuration memory back-up
- Speaker phone
